Claim Rejections - 35 USC § 112

1. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 and elsewhere, the limitation "which is incorporated" is ambiguous. Also, which method limitation does it further limit? In claim 7 and elsewhere, incorporated into a cover is unclear as to the which method step it is further limiting. In claim 8 and elsewhere, the scope of the "system" is unclear.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, and 14 rejected under 35 U.S.C. 102(b) as being anticipated by Boros, Multimedia Prospectuses.

The reference teaches that as early as 1996, prospectuses have been distributed via the internet as well as in paper form. The reference also teaches the distributing a prospectus via a CD_ROM. The examiner takes official notice that prospectuses include

the formats of summary and standardized. The limitation directed to the financial data of claim 14, is not further limiting.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boros, Multimedia Prospectuses.

The reference teaches that as early as 1996, prospectuses have been distributed via the internet as well as in paper form. The reference also teaches the distributing a prospectus via a CD_ROM. The examiner takes official notice that prospectuses include the formats of summary and standardized. The reference is silent as to encryption. The examiner takes official notice that encryption of data is well known. It would have been obvious for one skilled in the art at the time to have modified the primary reference as motivated by the need to limit access to so called professional investors.
